

GAS CHROMATOGRAPHY MAKE – LABTEK, ORIGIN – INDIA

In the New Series Gas Chromatography, technology has been utilized to its maximum so as to include automation, upgradation, convenience and affordability, all in one product. Possibilities of using the GC in packed, capillary or combination configurations, makes this instrument ideal for the widest range of applications. A function based integrated keyboard makes system operation and navigation simple and intuitive. The ability to have four injector and detector ports ensure convenient adaptation to suit specific needs.
