

CBR TEST APPARATUS (FIELD TYPE) MODEL NO – SL-GT-058, MAKE – LABTEK, ORIGIN – INDIA

IS 2720 (PART XXXI) 1969.

In recent years it has become important to know C.B.R. values in situ. It is useful in determining the load carrying capacity in the field when in place density and water contents are such that the degree of saturation is 80% of greater, when material is cohesionless and coarse grained, such that it is not effective by changes in water contents and when the material has been in place for considerable the loading is effected by means of a mechanical load frames which can be fixed to the under side of a truck.
